Individual Peer Evaluation Form

Your name: Ruben Brionez Jr

Write the name of your classmate you are preparing this review for in the designated column. Using a scale of 1-4 (1=strongly disagree; 2=disagree; 3=agree; 4=strongly agree) answer each question. If you aren't able to answer the question based on what is posted in the discussion board, reach out to your classmate for more information via the discussion board. Total the numbers in each column. **Make sure to answer the questions on the 2nd page.**

Evaluation Criteria	Peer Name: Nathanael Ochoa
Has plan in place to complete course project.	4
Has found datasets/data sources to support project idea.	4
Has solidified project idea.	4
Has identified resources for project.	4
Topic is related to data science and demonstrates topics learned to date through program.	4
Risks and potential issues have been identified.	3
TOTALS	23

Feedback on Individual's project topic:

1. How clear is the classmate's project topic? What questions does their topic make you consider?

   The structure of the paper makes it a little difficult to follow, it has been odd building different milestones on top of other milestones. I built my paper in a top-down order, so all newer information was always at the end of the paper. Maybe something to consider for the final project.

2. What risks or issues should your classmate consider while working on their project?

   I noticed that missing values were being populated to complete the records, I would be cautious with the type of values being replaced or entered. Be wary of unintentionally impacting the model with the values being populated. Maybe more information on what data and how the data is being populated would be good to include for transparency.

3. Additional suggestions/comments that might be beneficial to your peer?

   My only suggestion is to keep new readers in mind and format the paper in way that makes it easy for readers to follow the process and understand what steps were taken what the ultimate goal was/is.
